BORN—To Mr. and Mrs. Frank Grainger, a son, in Calgary hospital.

Mr. Bettcher Jr. is a patient in the Drumheller hospital with pneumonia.

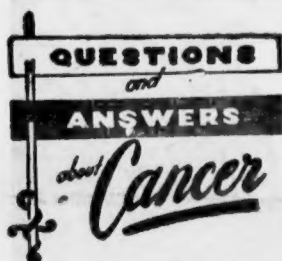

Mrs. Sid Cannings Jr. and son of Langdon are spending the week at the home of her parents Mr. and Mrs. Gillespie.

A. J. McLeod, agent for all magazines. Special offers on Christmas gift subscriptions.

Get yourself a nice Barometer. They are good company. We have them from \$20.00 to \$30.00.

These are set for 3,000 feet altitude.

FRANK E. HARRIS
JEWELLER
CARBON, ALTA.

QUESTION: How should a wart suspected of being cancerous be treated?

ANSWER: It should be removed surgically, cutting widely around the edge of the wart so as to include all cancerous cells that may have spread to the normal surrounding tissues.

Write for free literature
CANADIAN CANCER SOCIETY
DRUMHELLER, ALBERTA

Mrs. Bob Knecht of Swift Current spent a few days at the home of her parents, Mr. and Mrs. Ted Schmidt.

Mr. and Mrs. Howard Brown (nee Anna Carlson) were holiday visitors at the home of Mr. and Mrs. Walter Perman.

Mr. and Mrs. Verne J. Dresser announce the birth of their granddaughter, Donna Gail on October 1st, daughter of Mr. and Mrs. Ray Zachariassen.

Mr. Chas. Ross and Miss L. Mellin formerly of Carbon were Friday visitors at the home of Dr. and Mrs. McFarlane and they are leaving shortly for Arizona for the winter.

A potato dug on the G. L. McCracken place by Mrs. J. J. Bushby weighed 3 lbs. and measured 20 inches endways and 13 1/4 in. around the middle.

Mr. and Mrs. Sam Garrett and Dick, Mr. and Mrs. Sid Cannings Sr. of Carbon and Mr. and Mrs. Sid Cannings, Jr. of Langdon attended the Shriners Banquet and evening held in the Corral on Friday evening of last week.

Christ Church, Carbon held a Bazaar Shower on Wednesday evening. Many lovely gifts were brought. There were contests which were won by Mrs. W. Clark, Mrs. J. Barnes, Mrs. Van Loon, after which a delightful lunch was served.

Mr. and Mrs. E. Meicklejohn of Marwayne were weekend visitors at the home of Mr. and Mrs. Harry Holstein.

Len Poxon and Dusty, J. Flaws and Mr. Roulone of Didsbury were out goose hunting last week and report they got 26 geese.

Miss M. Mundle of Hawarden, Sask. was a weekend visitor at the home of her brother-in-law and sister, Mr. and Mrs. Harry Holstein.

Mr. and Mrs. David Flaws of Shaunavon, Sask. are visiting at the home of Mr. J. Flaws following their wedding which took place Oct. 3rd in Sask. Congratulations, David and bride.

Miss De Launey spent the holiday weekend at home in Red Deer and Mrs. Bennett spent the weekend at her home in Olds.

Mrs. Ed Hatcher of Calgary formerly of Hesketh left by plane Thursday for a three months visit in the Old Country.

Rev. E. H. Lewis has been appointed Dean of the Drumheller Anglican it was announced at the weekend. The area includes Carbon, Stettler, Hanna and Drumheller.

Donna Forsch had the misfortune to fracture her arm on one of the school swings. The children seem quite unfortunate these days.

KEEPING PACE...

Nowadays bank staffs use machines to do much of the record-keeping for nearly 9,000,000 deposit accounts. It is one of the reasons why they are able to keep up with the greatly-increased demand for banking services by more and more customers... and to maintain the same fast, efficient handling of your account.

Since 1900, bank staffs have increased from a few thousand to 43,600... the number of cheques handled to 1,000,000 a day.

WORKING WITH CANADIANS IN EVERY WALK OF LIFE SINCE 1817

Level Land Carbon D.A.'s Corner

Mr. and Mrs. Archie Roth were visiting with their parents for a few days.

Mr. and Mrs. Jacob Gimbel were visiting at Lacombe over the weekend.

Mr. and Mrs. John Kaiser of Red Deer were visiting in the district over the weekend.

Mr. Fred Lang of College Place, Wash. is visiting with his children and friends in this district.

Clifford Herrmann was staying at the home of Mr. and Mrs. John Leiske on Sunday and Monday.

Mr. and Mrs. Alex Herrman of Calgary and Mrs. E. Wutch of Medicine Hat were visiting in the district on Sunday.

Pastor and Mrs. Charles Cooper of Calgary visited the S.D.A. Church Oct. 10. Pastor Cooper was in charge of the meeting.

Clifford Schaber left last week to attend Pacific Union College at Angwin, California to finish his Secretarial Science course. Clifford will graduate in May.

Mr. and Mrs. David Schmidt of Lammings Mills, B.C. were visiting in this district over the weekend. Also their son-in-law and daughter, Mr. and Mrs. S. Cottrell of Fort Macleod.

Mr. and Mrs. Jacob Miller and Mrs. Siebel and Richard Reiswig of Goodrich, North Dakota were visiting for a few days in the Level Land district, and on Sunday Mr. and Mrs. E. Schaber went with them to visit with Mr. and Mrs. Joe Fleck at Tees.

Mr. J. Redgewell has recently purchased the Hugo De Blaquire farm.

William Dixon of the P.P.C.L.I. stationed in Calgary is spending Sharples.

The small paper this week is due to the fact our ready prints did not arrive.

Mr. and Mrs. G. L. McCracken and boys spent the weekend at Great Falls, Montana.

Mr. and Mrs. Norman Nash motored to Banff on Tuesday to attend the wedding of Corporal Pickerel of the R.C.M.P. formerly of Carbon and now stationed at Regina.

Mr. and Mrs. W. Hunt, Mr. and Mrs. Cyril Hunt and Ronald Hunt, all of Bowness and Mr. J. Robinson of Calgary spent Thanksgiving at the home of Mr. and Mrs. C. Cave.

Carbon High School Touch Rugby team were Acme visitors on Wednesday, Oct. 14th and were defeated 10-0 by the Acme team.

Pete Reddekopp, Acme quarterback, passed to Art Wiebe for both touchdowns.

In previous games, Acme defeated Carbon 6-1 and Carbon defeated Acme 10-0.

4-H CLUBS

"Show what you grow and share what you know" might well be the motto of the 4-H Grain Clubs. Don't forget the Grain Shows to be held at Carbon on October 22nd, with the Beiseker and Acme Clubs participating, and the Trochu Show on October 23rd with Torrington and Three Hills taking part.

The reorganization meeting of the Avondale 4-H Beef Club will be held in the town office Carbon on Friday, October 16 at 8 p.m. New members are welcome.

RATS

An area 25 miles wide and 200 miles long between Provost and Thelma along the Saskatchewan border has been rat-proofed by the Provincial Department of Agriculture. This work was completed by the N. L. Poulin Extermination Company of St. Boniface, Manitoba. In order to ensure that Alberta will remain rat free, Warfarin is to be supplied free to Municipal districts. If a rat is seen please report to

your Field Supervisor or District Agriculturist.

FALL CONTROL OF CANADA THISTLE

Control of Canada Thistle by cultivation should be continued right up until freeze up. Cultivation should be shallow, but all thistle growth should be cut. Plants should not be allowed to grow more than a couple of inches above the ground and this may mean cultivation every ten days or so.

Statistics show that nearly one fifth of the households in Canada were overcrowded in 1951. An overcrowded house is one in which the number of persons exceeds the number of rooms in the dwelling.

D. S. Thomson of Winnipeg, new C.P.R. vice-president of operation and maintenance at Montreal.

Serving Canada in the Army
you serve ...

Yourself

Comradeship is one of the best features of Army life. Ask any soldier! You take part in sports, live, work and face dangers with men who share your interests and ambitions.

Travel will give you wider experience and interests. There are many chances for travel in Canada and overseas. You see and learn more in the Army today than ever before.

Never before has an Army career offered so many advantages to young men. Army life is for men who want to help guard Canada's freedom. It is not an easy life — but it is a rewarding one. You and Canada profit by the many opportunities and benefits of military service. Here's how you gain when you serve Canada in the Army: good pay, financial security and pension; 30 days annual leave with pay; opportunities for special training, promotion, adventure. For Canada, you will represent another trained soldier to help guard our freedom.

To be eligible you must be 17 to 40 years of age, skilled tradesmen to 45. When applying bring birth certificate or other proof of age.

Apply right away — For full information write or visit the Army Recruiting Centre nearest your home.

CHRISTMAS SEALS

...Thousands of 1953 Christmas Seals have arrived in Calgary, for distribution to Calgary and district householders in November, it is announced by I. W. Parsons, chairman of the Kinsmen Club TB Christmas Seal committee. Dozens of voluntary workers are busy addressing envelopes, folding seals and letters, and preparing for the best Seal sale yet, according to Mr. Parsons.

Calgary and district objective for 1953 is \$54,000, Mr. Parsons said. Every cent is already budgeted for, with the provision that any surplus over the regular work of the Alberta Tuberculosis Association will be spent to install X-ray equipment in hospitals for routine chest X-ray of all admissions.

Mr. Parsons said, "This is one of our biggest and most important projects but we have a long way to go before reaching our goal of an X-ray unit in every hospital. At least four times as

MORE MINERALS FOR HOGS?

Should we be feeding our pigs a wider variety of minerals? Not according to tests at the University of Alberta. Dr. J. P. Bowland of the Department of Animal Science is in charge of the tests. Ground limestone and iodized salt definitely should be provided he says, but for growing and fattening pigs neither phosphorus nor trace elements need be added to our usual practical rations.

Farm grown grains on which Alberta swine rations are based are deficient in calcium and salt, but their analysis has shown no

much unsuspected TB is found among hospital patients as among the general population. Finding these "hidden casualties" and removing these sources of infection to sanatoria will prevent the spread of tuberculosis, which killed more than 2,500 Canadians last year."

need to supplement phosphorus. It is for animals fed roughages rather than concentrates that additional phosphorus is likely to be needed.

As for trace elements, feeders have known that most common practical swine rations in Alberta contained enough of these. But with use of antibiotics for swine feeding the question arose as to whether the more rapid gains might influence mineral requirements. The tests showed, however, that adding the trace elements, manganese or cobalt, or a mixture of manganese, cobalt, iron, copper, magnesium and zinc did not influence rate of gain or feed efficiency.

Of interest, too, are results of a pig feeding trial in which the commercial product, "Feed-Ani" is being used. The Department of Animal Science reports no benefit observed from the use of this supplement and an appreciable increase in the cost of gain. A note in the Canadian Journal of

Agricultural Science, July-August 1953, indicates similar results at the University of Saskatchewan.

At the University of Alberta, Feed-Ani is being fed as two per cent of the ration and as free choice at the same time. To the present, average daily gain of pigs receiving this product has been 1.32 lb. per pig per day compared with 1.39 lb. for the control lot receiving no Feed-Ani. Feed efficiency figures summarized to the end of the growing period show 309 lb. of feed per 100 lb. gain for the control lot as against 321 lb. of feed for the Feed-Ani lot, the research men advise.

From experiments to date, it would seem that supplemental minerals other than iodized salt and limestone are not required in Alberta swine rations. Necessary supplements, such as protein of good quality, calcium, iodized salt and vitamins A and D, pay for themselves many times

over, Dr. Bowland says. Unnecessary supplements to rations for swine are merely an added expense.

The hourly rate for construction workers in Canada stands at 142.4 cents an hour.

FOR SALE—Half Section Farm 3 miles west of Swallow. 250 acres broke. 70 acres coulee pasture with year round spring. 85 acres summerfallowed. House. Barn 22x23. Hen house 20x32. Brooder House 16x20. Garage and workshop 18x32. What offers Possession in April.

More people buy Chevrolets than any other car

GENERAL MOTORS VALUE

You'll find you get more power on less gas

Chevrolet's two great valve-in-head engines are high-compression engines. In Powerglide® models, you get the most powerful engine in Chevrolet's field — the new 115-h.p. "Blue-Flame." Gearshift models offer you the new 108-h.p. "Thrill-King" engine.

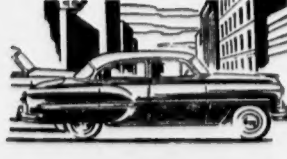

You'll discover it's the lowest-priced line

Chevrolet offers just about everything you could want. Yet it's the lowest-priced line in the low-price field. You can be ahead in every way with a new Chevrolet! *Combination of Powerglide automatic transmission and 115-h.p. "Blue-Flame" engine optional on "Two-Ten" and Bel Air models at extra cost.

You can even get Power Steering

You ought to try Power Steering to see how easy driving can be. Even standing still, you can spin the wheel with one finger! Yet there's nothing new to learn and you actually have safer control under all conditions. It's optional, of course, at extra cost.

You get greater getaway with the new Powerglide®

With Powerglide automatic transmission, you're automatically in "low" range for standing starts and for quick passing in city traffic. Then — automatically again — you slip smoothly into "cruising" range as you pick up speed.

Jumbo-Drum brakes give you smoother, easier stops

You'll feel safe and secure with these greatly improved Chevrolet brakes under your foot. An easy nudge on the brake pedal brings smooth, positive response — right now! With their 11-inch drums, Chevrolet brakes are extra large for extra safety.

Garrett Motors, Phone 31, Carbon

TB DEATHS DECLINE BUT INCIDENCE STILL HIGH

...Tuberculosis death rates have declined spectacularly in the past ten years, but TB deaths are no longer an indication of its potential dangers, according to provisional figures issued by the Bureau of Vital Statistics.

...This fact is vividly brought to mind by the decline in TB deaths from 6,000 in 1942 to 2,600 in 1952; on the other hand, patients under treatment in Canadian Sanatoria have increased from 12,000 in 1942 to 18,000 in 1952. It is obvious that there is still a great deal of tuberculosis in Canada, especially when it is noted that there is probably at least one unknown case for each one under treatment.

...D. W. Robertson, President of the Alberta Tuberculosis Association, pointed out that progress in preventive measures apparently has not kept pace with improvements in treatment techniques, such as new methods of surgery and the so-called miracle drugs. He stressed the importance of keeping in mind always that it is infinitely better to prevent tuberculosis than to cure it, and that our primary object should be prevention through education and assistance in the finding of unknown cases.

Provisional statistics indicate

DR. F. J. GREANEY,
Director,
Line Elevators Farm Service,
Winnipeg, Manitoba.

Sponsored by the following companies:
Federal, Alberta Pacific Pioneer, Canadian
Consolidated, Paterson, McCabe, Parrish &
Humber, Inter Ocean, Independent
Elison Milling, Canada West and Quaker
Oats.

Why Seed Tests? Know Your Seed!

Sure, your eyes can tell you a lot about the seed value of the grain you are keeping for planting next Spring, but they cannot tell you how well it will germinate, or whether or not it is contaminated with smut. Only through special seed tests is it possible to determine these important seed factors. Seed tests help you to know your seed.

Free Tests Available—As a service to farmers, the Line Elevators Farm Service operates one of the best cereal seed-testing laboratories in Canada. This laboratory will test any prairie farmers' seed sample of wheat, oats, barley, rye and flax, free of charge. All you have to do is take a sample of the seed you want tested to the nearest Agent of any of the Line Elevator Companies listed above. The Agent will forward your sample to Winnipeg for testing, and return the results to you.

Three Important Tests—Three types of tests are used to evaluate farmers' cereal seed samples. These are: (1) A germination test to determine germination percentage, or seed vitality. (2) A seed-washing test to determine whether or not the seed is contaminated with smut, and needs to be treated for smut control. (3) A test for weed seeds. The advantages of these tests need little comment. Good seed, as every farmer knows, must be of good germination, free of smut or other diseases, and free of weed seeds, other crop seeds and trash. Avoid risks! Know your seed! Have the grain you intend to use for seeding purposes tested as soon as possible. Plan now on planting only pure, clean, healthy and high germinating seed in 1954.

Warning—According to the Canada Seeds Act, all seed advertised, offered for sale, or sold in Canada must be tested at a government seed-testing laboratory. Tests made by the Line Elevators Farm Service are not "official" seed tests. Farmers who want to get an "official" test on their seed should send their samples directly to the Plant Products Division, Canada Department of Agriculture, at Winnipeg, Saskatoon, or Calgary.

EYE CARE

When compelled to function in poor light, eye muscles may become overworked as they try to adjust themselves to retain clear vision. As a result the muscles become fatigued and the eyes are strained. The symptoms of strain may vary: the eyes may feel hot and tired, the eyelids gritty or irritated, or the eyes may water, or appear slightly inflamed. If eyestrain is of long duration, the general health may be affected. Part of the remedy is to have sufficient light for close work. It is also wise to have the eyes examined periodically.

FAST WORKERS, THESE ACIDS

In a matter of a few minutes after eating, food particles start to form the acids that cause tooth decay. These particles, lodged in the crevices of the teeth, can be removed by a simple brushing—

that Alberta now has the second lowest death rate from TB, with a rate of less than 12 per 100,000 population. Ontario has the lowest rate, 8.4, and the rate for Canada is 17 per 100,000.

much more economical and less painful than having a filling. If it is not convenient to brush the teeth immediately after eating, the mouth should be rinsed with water. The important thing is to remove those destructive acids in time.

CINDERELLAS ARE OBSOLETE

Once upon a time, in Cinderella's era, the smaller the foot, the greater the beauty. Today's smart girl chooses her shoes for comfort; she knows that a shoe that pinches can add years to her apparent age, giving her an ugly-sister expression. When buying shoes, comfort should be the main consideration and the feet should be carefully measured for size. The shoes should be selected with their main purpose in view—sensible heels and good support for long hours of standing or walking, leaving the fragile, high-heeled styles for occasional wear.

DON'T LET THE BATH BE A HAZARD

Just when a small child is nicely installed in his bath, the tele-

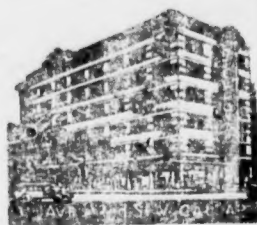

phone may ring. It is difficult to ignore that ring but during the few minutes' absence from the bathroom, baby may be in grave danger. Even very small youngsters can turn on the hot water tap, and can be scalded in a few seconds. Or they may turn on either tap and drown if they are left alone. If the phone must be answered, it is safer to remove the child and wrap him in towels while the call is answered. As most parents find out, a small child's capacity for getting into danger is boundless, and it requires much thought to prevent trouble.

PICTURES TELL THE STORY

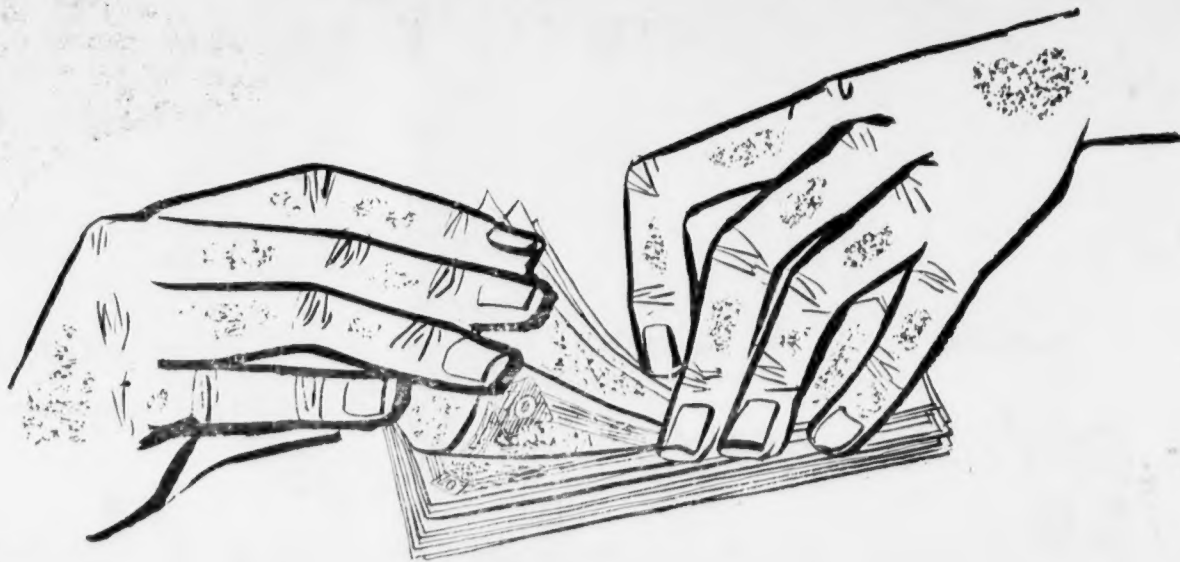

Pictures often help to tell a story much more clearly than a talk or the printed word, especially to children. To emphasize many of the facts of good health, films and filmstrips have been produced by the Dept. of National Health and Welfare. These are available in either English or French to study groups, schools or associations, through provincial health departments.

Freight tonnage moves ahead: In 1952 Canadian railways moved an average of 31.6 tons per loaded freight car mile against 30.5 tons the year previous.
